Bielsko-Biała, 18.08.2014r.

BOS/47/FZ/14

We hereby inform that on 18 August 2014, the BOSMAL Automotive Research and Development Institute Ltd received the questions according to an open-tender procedure for the supply of a brand new inertia brake dynamometer for vehicles' hydraulic drum and disc brakes testing. Details as below:

QUESTIONS:

1. Do we have to deliver the financial reports in Polish language?
2. We have a small conflict.

If we take our GIANT 6200 for your project we will be far too expensive.

Our brand new generation would fit perfect except at speed and data aquisition.

What tests do you intend to perform where you need 3000 rev/min?

Our new test stand is able to turn 2300 rev/min which is approx 240km/h driving speed.

What is the reason for an data aquisition resolution of 2000Hz.

Unfortunately we can only provide 1000Hz which is in our opinion enough.

ANSWERS:

- all documents included in your offer ought to be translated into Polish language with the exception of technical specification;
- we sustain the technical requirements described in the SECP.
